Abstract

Why are you doing what you are doing? What did you do? A little extra detail on what you did. What is the contribution of this work?

1 Introduction

Introduce the problem statement

2 Related Work

What have others done ? What ideas did you build off? What is the current state of the art?

3 Approach

How did you solve the problem / answer the question posed in the intro?

4 Experiments

What experiments did you run? What were your hyperparameters / recipes ? Everything needed to recreate the results

5 Conclusions

What have you shown to be true?
